

## Job Title: Software Developer

### Job Description

Our software developers are critical to our ability to retain our industry leadership position with our flexible, intuitive and feature rich platform. Our commitment to innovation is the driving force behind our continued growth and success. With an industry leading software platform, it's our developers who create the functionality and compelling user experience that offer improved efficiency, productivity and increased value for our customers. We're currently searching for an experienced developer to help guide and build our platform for the future. From researching progressive systems solutions to evaluating their impact to translating ideas into viable solutions, the ideal candidate will be wholly committed to and energized by the discovery and development of innovative solutions in an ever-changing digital landscape. To provide a holistic customer experience, the ideal candidate will also have a grasp of best practices for software development with an eye toward effective user design and data integrations with other platforms.

This role is designed for someone who flourishes in a fast-paced environment, has a strong work ethic, is a clear communicator and has a passion for technology and innovation. Your technical experience will shape the future of our industry leading platform and guide our product development roadmap to maintain our leadership position. At Exceleras, you will have a real opportunity to make a meaningful impact on the growth of our company.

If you're ready to join a fast-paced, ever-evolving SaaS company to drive innovation and enhance our industry leading platform, let's connect.

#### THE WORK YOU'LL DO:

- Design, build, modify, and implement technical solutions and applications (including analysis and coding), using web based programming languages and tool sets
- Provide in-depth technical troubleshooting, defect investigation, remediation, and root-cause analysis of items
- Create and execute unit test plans and review the plans of others
- Implement required software functionality meeting established requirements and specifications
- Provide recommendations on improvements to our product to increase development efficiency, quality, and the user experience
- Prepare and maintain system and user documentation and procedures
- Serve as thought leader for technical solutions, developing forward-thinking systems prototypes that promote increased efficiency and productivity on multiple levels

#### HOW YOUR CONTRIBUTIONS WILL BE MEASURED:

- Enable the overall growth and profitability targets of the company.

- Enable revenue growth through the expansion of features and services provided to existing clients, and adding valuable features to attract new customers.
- Drive customer satisfaction and retention through superior UI/UX design, system functionality and flexibility.

### THE EXPERIENCE YOU BRING:

- Bachelor's degree in IT, Computer Science, Software Engineering, or related field
- 5+ years of proven experience with web application development using a Microsoft technology stack. Highly proficient with front end development using HTML, CSS, and JavaScript. Experience with Angular 2+ or a similar framework such as React or View.js is preferred.
- Expertise in user interface design and usability concepts is highly desired.
- Competence with C#, ASP.NET, Entity Framework, MVC and SQL. Experience with T-SQL is preferred. Experience with all phases of the software development process (architecture, design, coding, implementation, testing, debugging)
- Strong analytical and problem-solving skills
- Ability to work in a fast paced, deadline-oriented environment
- Experience working effectively in a remote environment
- Understanding of user experience design strongly preferred
- Experience with reporting, analytics and data visualization would be a definite plus

### WHO YOU ARE:

- You have strong technical expertise, you're a specialist who works efficiently with confidence and competence
- You effectively manage multiple priorities while acting with a sense of urgency and personal accountability for high standards of performance and results
- You are competitive, enthusiastic, a self-starter, diligent, results-driven and disciplined
- You're driven to complete projects and tasks from start to finish, with a strong desire to see the meaningful impact of your efforts
- You welcome variety and opportunities to work in a fast-paced, flexible work environment
- You are disciplined, diligent, sincere, conscientious, responsive, thorough and precise
- You work collaboratively with clients and fellow team members
- You live and work with honesty, transparency and integrity

*\*\*Note: We know that excellent candidates can have all sorts of backgrounds and experiences, so please don't hesitate to apply even if you don't meet 100% of the listed requirements!*

**WORK LOCATION:** Virtual work environment with a highly-flexible schedule.

→ **We are committed to offering competitive and comprehensive compensation and benefits packages.**

### WHO WE ARE:

Located in Glencoe, Illinois, we were established in 2006. The founders applied over 20 years of national real estate experience to build a company that has become one of the industry's premier servicing technology firms in the U.S.

We view ourselves as a 16 year old start-up company with a record of being an innovative, invaluable solution by offering a system that is intuitive, flexible, and comprehensive. We offer a premier, web-based real estate transaction management platform, focused on mortgage servicing and real estate asset management. Our solution is the most comprehensive platform on the market and enables greater performance and efficiency for the valuation, management, sale and servicing of real estate. We cover all phases of portfolio management from initial default acquisition through foreclosure to final disposition, while providing easy access to a nationwide network of quality service providers including agents, attorneys, repair, title and settlement companies for enhanced communications between all parties involved in the transaction.

Our online real estate disposition platform is delivered as an integrated solution into the client's servicing platform or stand-alone system on a SaaS basis and was engineered to help maximize performance throughout the servicing process. Our platform integrates easily with all major servicing platforms to provide a single, reliable portal for enhanced communications between all parties involved in the transaction, while ensuring full compliance and accountability. Our platform includes a built-in process checks that ensure accurate and complete information to help servicers make more informed decisions. It also provides easy access to quality service providers across the country, from appraisers to attorneys. The firm's national vendor database includes ratings to help servicers make better, more accurate decisions.
